Hi Deke and Corrin,

County staff and staff of SWCA, the County's mitigation monitor, met the applicant at the site on 7/12 to conduct the Erosion Control and Tree Protection Inspection that is required prior to issuance of building permits. They will need to perform some corrections and call for a re-inspection once the corrections have been made. No date has been set. There are also other outstanding items that we need prior to issuance of permits (grading schedule, bio report).

It doesn't look like there was any further movement on the permits while I was out last week.

I'm sorry to hear about Deke's mom. Hope you both get to relax a little this summer.

Thanks

We hope you had a nice break with your family.
The summer has been really hectic for us.
Deke's Mom passed away in Oregon and my Mom has moved in to an Assisted living place.
Hope things will calm down for all of us soon.

Deke & Corrin

Hi Camille,

Would you give us the status of the Chamberlain Permit please.

Thank you,
Deke & Corrin
