PRCS – 12	MS – 2	PRCS – 0	MS – 6
<ul style="list-style-type: none"> • Early Terminations: 5 • Normal Terminations: 7 			

In the reporting period, we filed a total of fifty (50) revocations, with PRCS having forty-three (43) and MS having seven (7) revocation. The breakdown by violation category is below:

Violation Type	PRCS	MS	% of Q1 Revocations
Property	1	2	6%
Drug/Alcohol	5	0	10%
Crimes Against Persons	8	2	20%
Technical	23	3	52%
Other Crimes	6	0	12%
Total	43	7	100%

Generally, the population is reoffending by committing crimes similar to those for which they are on Realignment, namely non-serious, non-violent, non-serious sex related crimes.

Fifty-two percent (52%) of revocations were for technical violations. Technical violations of supervision are filed when supervisees abscond or fail to abstain from substance use. It is important to note that the Probation Department usually files formal revocations after lower sanctions have been attempted, including flash incarcerations for PRCS cases. However, at times, officers may decide that a formal revocation is more appropriate than utilizing lower sanctions, depending on the circumstances of the violation. Forty-eight percent (48%) of revocations filed were for new law violations involving crimes against persons, property, drug/alcohol related crimes as well as other crimes.

There were ten (10) **flash incarcerations** during this reporting period.

Seven (7) cases were **transferred** to another county for supervision.

Recidivism Definition

San Mateo County: Arrest and/or Charges Filed within 3 years of Last Incarceration in San Mateo County, including warrant arrests, PTA/Court Sentence but **excludes** PRCS flash incarcerations/Revocation, 647/849B1 (no charges filed) or dropped charges.

Attorney General: An arrest resulting in a charge within three years of an individual's release from incarceration or placement on supervision for a previous criminal conviction

BSCC: A conviction of a new felony or misdemeanor committed within three years of release from custody or committed within three years of placement on supervision for a previous criminal conviction.

REALIGNMENT BULLETIN CY Q3: July 2023 — September 2023

Executive Summary:

Offenses committed by the supervised and in-custody realignment populations in San Mateo County during July through September (Q3) continue to show that this population commits drug and property crime offenses. However, we continue to see domestic violence, assault, and weapons related offenses as well.

Overview:

During Q3, burglary (16%), drug and alcohol offenses (14%), and vehicle theft (13%) were the top committing offenses for the realignment population (this includes the new supervised cases and in-custody realignment offenders). Please note, "miscellaneous" refers to a number of assorted offenses that do not amount to any one category. These offenses include but are not limited to: elder abuse, violating court orders, and various sex crimes.

The data used for this analysis was derived from information provided by the San Mateo County Probation Department and the SMCSO Corrections Division.

AB109 In-Custody on the Last Day of the Quarter:

On the last day of the quarter (September 30, 2023), the total AB109 in-custody population was 8.18% (89) of the overall average daily population (1,088), a slight decrease from the prior quarter 9.35% (99) with an ADP of 1,059.

During Q3 CY2023, vehicle theft, burglary, grand theft, and drugs & alcohol comprised the top new charges committed by the in-custody population. Please note that the category "Other Property Crimes" refers to offenses such as elder theft, receiving stolen property, embezzlement, forgery, and larceny. "Miscellaneous" refers to a number of assorted offenses that do not amount to any one category. These offenses include but are not limited to: evading, false imprisonment, stalking, and arson.

FISCAL YEAR 2022-23 FOURTH QUARTER
SUMMARY REPORT NARRATIVE

SAN MATEO COUNTY HEALTH

**BEHAVIORAL HEALTH
& RECOVERY SERVICES**

Please Note: The BHRS Service Connect Dashboard is presented one quarter in arrears to present accurate data because submission deadlines are too soon after the quarter close.

AT-A-GLANCE: All Time Total BHRS Referred, Served, Number of Services, or Booking Encounter

The total number of participants referred to BHRS for treatment since July 1, 2017, is 3158 (increase of 15 over Q3) and of these, 1,844 (increase of 15 over Q3) entered treatment and/or recovery plans (participants served by BHRS and is a lower number because not all assessments result in treatment). Referred is defined as participants showing up for the first post-referral appointment and does not include those referred, but who did not follow through on the referral. This also represents the total number of services, 25,175 (both mental health and substance use treatment) provided to participants since the inception of the program.

Open Service Connect Cases with a Service

This graph represents total Service Connect participants that received at least one BHRS service. The numbers do include participants that continued from quarter to quarter, so a participant could be counted more than once in each quarter if their case was open across multiple fiscal quarters. The Q4 count is 138, which is higher than typical and the highest quarter of the year, most likely because referrals and new cases were down substantially.

Engaged Participants with Four or More Services in a Year

“Engaged” is defined as a participant receiving four or more services, meaning the participant has returned to BHRS for multiple appointments for different services, demonstrating the participant is engaged because they actively participate. Engagement is up by 6% over last quarter and is consistent with the historical counts for engaged.

Percent of Participants with Substance Abuse Recovery Plan or a Mental Health Treatment Plan

This graph presents the percentage of participants who had a mental health treatment plan or a substance abuse recovery plan. Recovery plans are typically at a rate of two to one as compared to a mental health treatment plan. The results for Q4 are consistent with historical rates.

Living Situation Upon Program Admission and Discharge

This graph shows the living situations of participants at the time the participant was admitted to the program and then the living situation when discharged from the program. The purpose of

this measure is to monitor the service impact on improvement of the living situation of the participant Q4 shows upon discharge from Service Connect that less participants were in a justice-related facility, more were in residential/community treatment facilities, and homeless increased by 1.

Total Individuals Referred to Service Connect and Total Admitted for Services

Not all individuals referred to the program meet the assessment criteria for admission to the program, so this graph measures the difference between the number of persons referred and the number that are admitted and served for each quarter. The results for Q4 demonstrate an unusual decrease in referrals and decrease in the number served. This did allow for more participants overall to be served, but this result will be further reviewed.

Social Orientation and Gender Identity (SOGI) Data

BHRS collects SOGI data in five categories at admissions and across the life of a case to inform other levels of government of the needs of all populations. Q4 displays only Sexual Orientation and Pronouns and is consistent with recent quarters.

Correctional Health Services

Correctional Health data presents the total participants that flow through Correctional Health by quarter. The counts represent the participants who were screened, medically treated, and referred for mental illness and substance abuse treatment. Q4 shows a major increase of total referrals, but Service Connect referrals remain low.

Service Connect Cases with PES Counts

A Psychiatric Emergency Services (PES) count is when a Service Connect participant has presented themselves at PES. Those participants that were not admitted are shown as a “visit” and those admitted are shown as “inpatient.” Involvement with PES is only counted if enrolled in Service Connect—counts do not include episodes when subject was not a participant in Service Connect. Q4 shows a spike in PES visits, which remain less than half the average of 25 visits.
