MITIGATION/IMPACT FEES THAT MAY APPLY IN THE BUILDING PERMIT PHASE

Affordable Housing Impact fees are calculated based on Ordinance 4758 adopted June 7, 2016. These fees apply to residential and non-residential development and are calculated as described at <https://www.smcgov.org/planning/fees>.

Mid-Coast Park and Recreation Development fees are calculated based on Ordinance 4155 adopted January 28, 2003. These fees apply to (1) new residential development and (2) residential reconstruction or remodeling projects that increase the assessable space of an existing residence in the unincorporated Mid-Coast area of the County (i.e., the communities of Montara, Moss Beach, El Granada, Miramar, and Princeton). Farm labor housing projects and lower-income housing projects are exempt from the fee. (Ordinance Code § 2.64.060).

Roadway mitigation fees are established by Ordinance 3277 adopted November 20, 1990. They are calculated based on square footage (assessable space of the proposed building). Farm Labor housing projects, lower-income housing projects, and green houses are exempt from the fee. (Section 14 of Ordinance No. 03277)

NOTES

01. Application filing fee is due upon submittal and is non-refundable. Unless otherwise stated, the application filing fee applies to each filing of a separate permit application, whether for one or several permits, and is applied in addition to the fees identified by the applicable fee schedules.
02. For a mobile home not located within Title 25-regulated parks (without permanent foundation).
03. The research fee does not apply to Public Records Act requests, which are charged based on photocopying costs.
04. Planning Administration fee applies to all residential and non-residential new and/or major addition building permits, and non-residential change of occupancy permits; standalone minor permits such as solar, plumbing, water heaters, kitchen remodels) are exempt.
05. The Director of Planning and Building is authorized to adjust Building fees in unusual circumstances when the regular fees listed above would clearly be excessive for a minor project requiring limited service. In such cases, the Director of Planning and Building is authorized to reduce the fees to reflect actual staff costs. In other cases, when County costs for reviewing a major project will clearly exceed revenues from the regular fees, the Director of Planning and Building is authorized to increase the fees to reflect actual staff costs, including time, material, and overhead for additional work not listed in this schedule. Any adjustment in fees shall be documented by the Director of Planning and Building in writing.
06. All Planning and Building Department fees are waived for 1) new affordable housing projects, as mandated by Board of Supervisors Resolution No. 62405, and 2) farm labor housing permits and renewals, as mandated by Board of Supervisors Resolution No. 54443. Fees imposed by other County departments and non-County agencies may still apply, such as California Building Standard fee, fire, public works, and environmental health.
07. For after-the-fact permit fees, please refer to the latest San Mateo County Ordinance Code, Division VII (Building Regulations).

NOTES

08. Additional development impact fees or mitigation fees, including State mandated impact fees may apply depending on the location and scope of a project. Applicants are advised to anticipate these costs as part of the overall project costs. Additional impact or mitigation fees will be determined prior to permit issuance.
09. Refund Policy: The Building Official may authorize a refund to an applicant of 75 percent of the permit fee, if all of the following conditions are met: building permit fees (not including plan check, filing, energy compliance, microfilming, geotechnical, or other ancillary fees) are greater than \$500; the refund request occurs within 90 days of permit issuance; no construction or demolition work has been performed under the permit; the permit has not expired or been canceled; the permit was not issued as part of an Information Notice or Stop Work Notice. The refund of such fees shall not include plan check, filing, energy compliance, microfilming, geotechnical, or other ancillary fees. Refund is made to the payer for the permit fee or other person specified by the payer.
10. The Director of Planning and Building is authorized to waive up to 35% of building fees for projects undertaken by another public agency or community-based non-profit agencies/organizations that provide services resulting in public benefits.
11. Department of Public Works Review Fee includes one review of applicant's proposed project and two site inspections. County Staff time beyond these services will be charged \$100.00 for each additional review or site inspection.
